

## Oversight: A Lens Into Your Enterprise Spend Risk

Oversight's audit and risk management platform consolidates spend data from any source system and uses the power of AI to automatically analyze 100% of your transactions – T&E, P-Card, Fleet, Payables, e-Procurement, and General Ledger entries. By evaluating spend in aggregate, you can identify financial, compliance, and fraud risk no matter where it resides.

Oversight reduces non-compliant spend by 70% and maximizes audit efficiency by as much as 90%, while improving cash flow across your organization.

## Protection from fraud and payment errors with real-time, continuous monitoring of AP processes

Organizations are increasingly becoming targets for payments fraud. In fact, 82% of companies said they were targeted last year. Schemes are becoming more sophisticated, too, meaning current financial controls and ERP systems serve as a first line of defense at best.

Powered by AI, Oversight's Payables solution reinforces your protection against fraud, errors, and waste by providing continuous monitoring and real-time visibility into your AP processes. With Oversight, you'll know where risk resides amongst 100% of your vendors, POs, and invoices before you make a payment.

*To help you better manage your payables practice, the Oversight Dashboard enables analysis of payment and compliance data across your organization. Information is aggregated across multiple data dimensions, including business unit, vendor, spend category, and employee, giving you a complete view of AP performance.*

## End-to-End Visibility into AP

- Tracks and documents all process steps, supporting evidence, and remediation efforts with a built-in audit trail and integrated workflow system
- Allows you to manage AP processes with up to 90% less effort
- Integrates with all major ERP systems

## Prevent Payment Errors, Detect Fraud

- Identifies duplicate invoices, payments and erroneous POs before they are processed
- Flags invoices and payments to the wrong vendor
- Detects unusual activity, including abnormal amounts, pricing, buyers, currency, items, frequency, split purchases, etc.

## De-Risk the Vendor Master

- Detects duplicate, invalid, or suspicious vendors based on name, address, tax identification number, bank account, and other factors
- Prevents prohibited transactions by automatically detecting vendors on the Office of Foreign Assets Control (OFAC) and other watch lists
- Ensures compliance with anti-bribery and corruption laws, such as the Foreign Corrupt Practices Act (FCPA)
